OUTSIDER

BROTHER OUTSIDER takes a multifaceted approach, reflecting the complexity of Bayard Rustin's story. This feature-length portrait unfolds both chronologically and thematically, using interviews and traditional documentary techniques, as well as experimental approaches. Rustin's and other first-person voices contrast with excerpts from Rustin's FBI files, which present J. Edgar Hoover's view of Rustin as a "suspected communist and known homosexual subversive." BROTHER OUTSIDER creates an aesthetic that reflects Rustin's position as an outsider, a troublemaker and an eloquent speaker who refused to be silenced.
